

RAFIK BAIG

Mississauga, ON | [linkedin.com/in/rafik-baig](https://www.linkedin.com/in/rafik-baig)

SUMMARY OF QUALIFICATIONS

- Hands-on SolidWorks experience designing and simulating mechanical parts as course work directly supporting product/machine design requirements of this role.
- Applied understanding of manufacturing processes and workflow optimization through Manufacturing Fundamentals and Engineering Design lab coursework at TMU, providing a foundation for ergonomics and material flow analysis.
- Proficient in Microsoft Excel and PowerPoint for technical documentation and data presentation, with demonstrated use in academic projects and professional computer technician work.
- Proven ability to multitask effectively in fast-paced environments, managing inventory, customer service, and operational tasks simultaneously across two retail positions over 3+ years.
- Reliable team contributor with experience collaborating on performance-focused engineering projects, with a strong academic record (3.19/4.33 GPA) in Mechanical Engineering at TMU.

TECHNICAL SKILLS

CAD / Design: SolidWorks (parts, assemblies, simulation), AutoCAD 3D

Software: Microsoft Excel, PowerPoint, Word; Vernier Graphical Analysis

Programming: C, MATLAB

Hardware / Lab: Desktop workstation configuration, hardware installation, OS diagnostics; physical lab instrumentation

EDUCATION

Bachelor of Engineering – Mechanical Engineering | Toronto Metropolitan University

2024 – Exp. 2028

GPA: 3.19/4.33 | Relevant Coursework: Engineering Dynamics, Introduction to Engineering Design

RELEVANT EXPERIENCE & PROJECTS

Design Team Member | Toronto Metropolitan Formula Racing Team, TMU

Sept 2024 – Present

- Collaborated with multidisciplinary engineering team to evaluate and discuss design modifications aimed at improving vehicle performance and structural efficiency.
- Utilized SolidWorks to design new components and run simulations, gaining practical experience in part design and iterative engineering development.
- Participated in technical reviews and contributed to team decisions on design trade-offs, developing skills in engineering communication and teamwork.

Engineering Lab Projects | Toronto Metropolitan University

2024 – Present

- Conducted Dynamics lab experiments analyzing motion, force, and energy systems; documented findings using Excel, MATLAB and Vernier Graphical Analysis software.
- Completed Physics lab series including mechanics and electrical systems, applying scientific method and precise data collection techniques to validate theoretical models.
- Produced technical lab reports with quantitative analysis and structured recommendations, meeting engineering department documentation standards.

Computer Technician | OS Experts INC, Mississauga

Feb 2023 – May 2024

- Deployed and configured desktop workstations and peripherals for clients, ensuring systems met operational specifications with zero reported failures post-setup.
- Diagnosed hardware/software issues and performed updates, improving system reliability; documented all work orders and service records in Microsoft Office.
- Maintained organized records of data files and assisted with document management, supporting adherence to company operational procedures.

Sales Associate | H&M, Mississauga

June 2024 – Present

- Managed inventory organization, shipment processing, and merchandise replenishment in a fast-paced retail environment, demonstrating strong time management and attention to detail.
- Handled cash and credit transactions accurately and collaborated with team members to meet store sales goals, contributing to a positive and organized work environment.
